Safe Harbor statement

This presentation includes forward-looking statements within the meaning of the federal securities laws. Actual results could differ materially from such forward-looking statements. The factors that could cause actual results to differ are discussed herein and in Duke Energy’s SEC filings, available at [www.sec.gov](http://www.sec.gov).

Regulation G disclosure

In addition, today's discussion includes certain non-GAAP financial measures as defined under SEC Regulation G. A reconciliation of those measures to the most directly comparable GAAP measures is available in the Appendix herein and on our Investor Relations website at [www.duke-energy.com/investors/](http://www.duke-energy.com/investors/).
Safe harbor statement

This document includes forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. Forward-looking statements are based on management’s beliefs and assumptions and can often be identified by terms and phrases that include “anticipate,” “believe,” “intend,” “estimate,” “expect,” “continue,” “should,” “could,” “may,” “plan,” “project,” “predict,” “will,” “potential,” “forecast,” “target,” “guidance,” “outlook” or other similar terminology. Various factors may cause actual results to be materially different than the suggested outcomes within forward-looking statements; accordingly, there is no assurance that such results will be realized. These factors include, but are not limited to: the impact of the COVID-19 pandemic; State, federal and foreign legislative and regulatory initiatives, including costs of compliance with existing and future environmental requirements, including those related to climate change, as well as rulings that affect cost and investment recovery or have an impact on rate structures or market prices; The extent and timing of costs and liabilities to comply with federal and state laws, regulations and legal requirements related to coal ash remediation, including amounts for required closure of certain ash impoundments, are uncertain and difficult to estimate; The ability to recover eligible costs, including amounts associated with coal ash impoundment retirement obligations and costs related to significant weather events, and to earn an adequate return on investment through rate case proceedings and the regulatory process; The costs of decommissioning nuclear facilities could prove to be more extensive than amounts estimated and all costs may not be fully recoverable through the regulatory process; Costs and effects of legal and administrative proceedings, settlements, investigations and claims; Industrial, commercial and residential growth or decline in service territories or customer bases resulting from sustained downturns of the economy and the economic health of our service territories or variations in customer usage patterns, including energy efficiency efforts and use of alternative energy sources, such as self-generation and distributed generation technologies; Federal and state regulations, laws and other efforts designed to promote and expand the use of energy efficiency measures and distributed generation technologies, such as private solar and battery storage, in Duke Energy service territories could result in customers leaving the electric distribution system, excess generation resources as well as stranded costs; Advancements in technology; Additional competition in electric and natural gas markets and continued industry consolidation; The influence of weather and other natural phenomena on operations, including the economic, operational and other effects of severe storms, hurricanes, droughts, earthquakes and tornadoes, including extreme weather associated with climate change; Changing customer expectations and demands including heightened emphasis on environmental, social and governance concerns; The ability to successfully operate electric generating facilities and deliver electricity to customers including direct or indirect effects to the company resulting from an incident that affects the U.S. electric grid or generating resources; Operational interruptions to our natural gas distribution and transmission activities; The availability of adequate interstate pipeline transportation capacity and natural gas supply; The impact on facilities and business from a terrorist attack, cybersecurity threats, data security breaches, operational accidents, information technology failures or other catastrophic events, such as fires, explosions, pandemic health events or other similar occurrences; The inherent risks associated with the operation of nuclear facilities, including environmental, health, safety, regulatory and financial risks, including the financial stability of third-party service providers; The timing and extent of changes in commodity prices and interest rates and the ability to recover such costs through the regulatory process, where appropriate, and their impact on liquidity positions and the value of underlying assets; The results of financing efforts, including the ability to obtain financing on favorable terms, which can be affected by various factors, including credit ratings, interest rate fluctuations, compliance with debt covenants and conditions and general market and economic conditions; Credit ratings of the Duke Energy Registrants may be different from what is expected; Declines in the market prices of equity and fixed-income securities and resultant cash funding requirements for defined benefit pension plans, other post-retirement benefit plans and nuclear decommissioning trust funds; Construction and development risks associated with the completion of the Duke Energy Registrants’ capital investment projects, including risks related to financing, obtaining and complying with terms of permits, meeting construction budgets and schedules and satisfying operating and environmental performance standards, as well as the ability to recover costs from customers in a timely manner, or at all; Changes in rules for regional transmission organizations, including changes in rate designs and new and evolving capacity markets, and risks related to obligations created by the default of other participants; The ability to control operation and maintenance costs; The level of creditworthiness of counterparties to transactions; The ability to obtain adequate insurance at acceptable costs; Employee workforce factors, including the potential inability to attract and retain key personnel; The ability of subsidiaries to pay dividends or distributions to Duke Energy Corporation holding company (the Parent); The performance of projects undertaken by our nonregulated businesses and the success of efforts to invest in and develop new opportunities, The effect of accounting pronouncements issued periodically by accounting standard-setting bodies; The impact of U.S. tax legislation to our financial condition, results of operations or cash flows and our credit ratings; The impacts from potential impairments of goodwill or equity method investment carrying values; and the ability to implement our business strategy, including enhancing existing technology systems.

Additional risks and uncertainties are identified and discussed in the Duke Energy Registrants' reports filed with the SEC and available at the SEC's website at sec.gov. In light of these risks, uncertainties and assumptions, the events described in the forward-looking statements might not occur or might occur to a different extent or at a different time than described. Forward-looking statements speak only as of the date they are made and the Duke Energy Registrants expressly disclaim an obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

Recent accomplishments provide clarity and momentum

ADVANCED STRATEGY WHILE MAINTAINING OPERATIONAL EXCELLENCE

✓ Raised growth rate to 5% - 7%(1), driven by the largest fleet transition in the US
✓ Hosted inaugural ESG day, clearly articulating our clean energy transition and investment opportunity
✓ Announced sale of 19.9% minority interest in DE Indiana for $2.05 billion to GIC; eliminating the need for equity through 2025
✓ Maintained a sharp focus on our cost structure, operational excellence and customer service

REGULATORY OUTCOMES PROVIDE CLARITY

✓ IN rate case with forward looking test year approved
✓ Comprehensive NC coal ash and rate case settlements approved
✓ FL settlement establishing multi-year rate plan through 2024 approved
✓ FL Clean Energy Connection and first three years of Storm Protection Plan approved
✓ Piedmont TN rate case settlement approved

STRONG TRACK RECORD OF DELIVERING SUPERIOR SHAREHOLDER RETURNS

Source: Factset. As of June 8, 2021; (1) Reflects gross total shareholder return of the S&P 500 Utility Index
Our Clean Energy Transformation
≥50% REDUCTION IN CO₂ EMISSIONS AND NET-ZERO METHANE EMISSIONS BY 2030 ON THE WAY TO NET-ZERO CO₂ BY 2050

Clear vision for the future – to lead the energy transition

Transform the system
robust $59 billion capital plan focused on clean generation and grid investments

Shape the landscape
to accelerate the transition, with an eye on reliability and affordability

Deliver value
for customers and shareholders

Near-term initiatives

Carolinas
• Collaborating with NC policymakers and stakeholders to support the state’s energy transition
  • Advancing IRP process in both states

Florida
• MYRP settlement approved and order issued; advancing grid, solar and EV infrastructure

Indiana
• Actively working with stakeholders as we prepare for comprehensive Nov. IRP filing

Federal
• Engaging policymakers to advance shared objectives on climate
Duke Energy – a large scale, highly regulated energy infrastructure company

- Operating in six constructive jurisdictions, with attractive allowed ROEs, serving 7.9 million retail customers
- Customer rates below the national average
- Balanced generation portfolio that has reduced its carbon emissions by over 40% since 2005
- Industry-leading safety performance, as recognized by EEI

- Five state LDCs serving 1.6 million customers
- Strong earnings trajectory driven by customer growth, system integrity improvements, and continued expansion of natural gas infrastructure
- Efficient recovery mechanisms allow for timely recovery of investments

- Approximately 4 GWs of wind and solar in operation
- Long-term Power Purchase Agreements with creditworthy counterparties

(2) Year to year reductions will be influenced by customer demand for electricity, weather, fuel and purchased power costs and other factors.
Organized to leverage our scale, but with a regional focus

DUKE ENERGY INVESTOR UPDATE – SUMMER 2021
Leveraging our scale by investing for the future

Duke Energy: Lighthouse
Our achievements in operational excellence are delivering a digital transformation

Inspired nearly 1,000 employee contributors with a 98% positive experience response

Engaged 12 enterprise-wide business units

Saved over 400,000 work-hours with new operational efficiencies

Built 39 new digital products since launching Lighthouse

Average of <6 months to achieve Minimum Viable Product (MVP)

Attained an average payback time of <2 years

Achieved 72% average product satisfaction across portfolio

Optimist Hall

- Dedicated innovation center in Charlotte, NC
- Allows software engineers, designers, data scientists and business units to collaborate on a variety of new projects
- Two primary objectives:
  - Improve the customer experience by developing user centric products and services
  - Improve operational efficiency which reduces cost

Cybersecurity and IT

- Our size and scale allow for efficient investments in cybersecurity & IT
- Investing $1 billion in IT and cybersecurity on an annual basis, including O&M and capital
- Over 2,000 technology professionals operate 24/7
- These investments are advancing our digital transformation across all jurisdictions, while keeping our assets and data secure
Complementary businesses with strong growth opportunities

**Electric Utilities & Infrastructure**
- 86% contribution
- $49.5 B CAPEX
- 5-7% CAGR

**Gas Utilities & Infrastructure**
- 9% contribution
- $5.7 B CAPEX
- 5-7% CAGR

**Commercial Renewables**
- 5% contribution
- $2.5 B CAPEX
- 8-10% CAGR

---

(1) Based upon the midpoint of the 2021 adjusted EPS guidance range of $5.00-$5.30 per share as most recently reaffirmed in the Q1 2021 Earnings Review and Business Update on May 10, 2021; excludes the impact of Other

(2) CAGR off of the components of the midpoint of the 2021 EPS guidance range of $5.00-$5.30 per share as most recently reaffirmed in the Q1 2021 Earnings Review and Business Update on May 10, 2021; consolidated growth rate includes the impact of Commercial Renewables (approximately flat growth) and Other

(3) Net of tax equity financing
Projected growth over five-year plan

UPSIDES TO PLAN

- Acceleration of clean energy transformation
- Sustainable cost transformation
- Federal legislation, including infrastructure
- Stronger and faster economic recovery

ITEMS TO MONITOR

- Economic recovery from pandemic
- Weather and storms

5-YEAR ADJUSTED EPS GROWTH PLAN(1)

- 2020A: $5.12
- 2021E: $5.15 (2)
- 2022E
- 2023E
- 2024E
- 2025E

5% - 7% CAGR(2)

5 – 7%
GROWTH THROUGH 2025 OFF 2021 MIDPOINT OF $5.15(1)

(1) As most recently reaffirmed in the Q1 2021 Earnings Review and Business Update on May 10, 2021.
(2) Based off the midpoint of 2021 adjusted EPS guidance range ($5.15) As most recently reaffirmed in the Q1 2021 Earnings Review and Business Update on May 10, 2021.
Making investments to accelerate our pace of change

GROWING FIVE-YEAR CAPITAL PLAN DRIVES SIGNIFICANT EARNINGS BASE GROWTH...

... AS WE EXECUTE THE LARGEST COAL CLOSURE IN THE INDUSTRY

50 TO 70% REDUCTION IN ACTIVE COAL UNITS BY 2030(1)

TRIPLING RENEWABLES PORTFOLIO BY 2030

ADDING 15 – 20 GW(1)

Range of estimated capital deployment needed to effectuate clean energy transition across all jurisdictions

(1) Based on 2020. Reflects range of portfolios in the Carolinas IRP. Coal retirements exclude Edwardsport and Cliffside 6 coal units that can run 100% on natural gas. Renewables includes owned, operated and under contract. 2030 capacity will be dependent upon state and federal policies and regulations, as well as other external factors.
Balance sheet supports our long-term growth strategy

**COMMITTED TO STRONG CASH FLOWS SUPPORTIVE OF CREDIT RATINGS**

- Duke Energy operates in constructive jurisdictions, with a de-risked financial plan
  - Rate case orders or settlements in Carolinas, Indiana, Florida and Tennessee
- Proven capability to drive operational efficiencies
  - Track record of cost management and capital optimization
  - Pension plan fully funded (no expected contributions in 5-year plan)
- Creative capital raising supports credit
  - Partnership with GIC to secure minority investment in DEI
  - Commercial renewables joint venture with John Hancock
  - Tax equity partnerships for Commercial Renewables
- Current credit ratings provide highly competitive cost of debt
- Targeting 14% FFO/Debt throughout the 5-year plan
  - Provides adequate cushion to absorb unplanned events and maintain current credit profile

---

**NO COMMON EQUITY ISSUANCES IN 5-YEAR PLAN**
Size and scale enhance credit quality

**FFO/Debt downgrade thresholds**

“A utility that warrants a Strong or Strong/Adequate assessment has scale, scope, and diversity. We generally believe a larger service territory with a diverse customer base and average to above average economic growth prospects provides a utility with cushion and flexibility in the recovery of operating costs and ongoing investment.”

S&P Global Ratings

“Duke is one of the largest utility holding companies in the US. Its credit profile reflects the company’s diverse, low business risk operations in which over 90% of earnings and cash flow are derived from rate regulated businesses in growing economies with historically supportive regulators.”

Moody’s

Source: Moody’s and S&P. (1) Reflects senior unsecured credit rating. Moody’s peers include: AEP, AVA, CNP, D, DTE, ED, ETR, EVRG, SO, SRE. S&P peers include: AEE, AGR, AQN, CMS, CNP, D, DTE, ETR, PEG, SRE.
NC COAL ASH AND RATE CASE ORDERS ELIMINATE UNCERTAINTY…

- ROE of 9.6%; 52% equity ratio
- Deferral treatment of grid improvement plan projects of $1.2 billion including return
- Resolves coal ash issues in 2017 and 2019 rate cases and provides greater clarity on recovery through early 2030
  - Allows return at 150 basis points lower than prevailing ROE

AND NC&SC IRPS OUTLINE MULTIPLE PATHWAYS TO A CLEANER ENERGY FUTURE…

- Renewables take center stage in five of six pathways, while natural gas continues to play a vital role
- Base case has a least cost standard, following current energy policy
- Other portfolios present options for accelerated decarbonization, a Duke Energy priority with emerging support in the Carolinas
- All portfolios represent significant capital opportunities

Florida update

RESOLVED REGULATORY HEADWINDS POST PROGRESS MERGER…

- Cost recovery and securitization of CR-3 nuclear plant
- ~$1 billion of cost recovery, including a return, of Levy investments
- Full NBV recovery of retired CR 1&2 coal-fired units
- Timely recovery of $800 million of storm costs

... AND MAKING CUSTOMER-CENTRIC INVESTMENTS

- 2018: $1.5 billion Citrus County combined cycle plant
- 2021: 2 million AMI meters installed
- 2021: New state of the art customer billing system on track for installation in November
- 2022-2024: Investments under MYRP, order issued June 4
- 2018-2024: $2 billion investment in utility scale solar projects
- 2021-2030: >$6 billion of investments to strengthen, modernize and make the grid more resilient

Midwest update

**Duke Energy Indiana**

**FAIR AND CONSTRUCTIVE RATE CASE OUTCOME IN 2020…**

- Order supports strong cash flows and recovery of generation and grid investments
- 9.7% ROE and 53% equity ratio
- Recovery on and of coal ash investments
- Edwardsport book value and operating costs in base rates
- Significant progress on fleet diversification plans – reduced remaining depreciable life of coal assets by ~40%

... AND UPCOMING IRP OFFERS A ROADMAP FOR THE FUTURE

- Fall 2021 IRP provides additional renewable and gas investment opportunities underpinning green transition
  - Provides opportunity to map out transition of ~4GW coal fleet
- Modern rate mechanisms minimize lag (e.g., grid and environmental riders)
- Sale of 19.9% stake highlights premium value

**Duke Energy Ohio**

**LOW RISK BUSINESS WITH EFFICIENT RECOVERY MECHANISMS**

- Ohio: Consistent deployment of capital through riders in wires only electric and natural gas utilities
- Kentucky: Forward looking test years for both electric and natural gas rate cases
- ~9% earnings base growth, 2015-2025

**O&M Cost Management: Midwest**

2021 REGULATORY FILINGS ON TRACK

- Tennessee rate case settlement approved
- North Carolina rate case filed March 22$^\text{nd}$
  - Includes investments to accommodate growth in our communities
  - Provides infrastructure to decrease price volatility for customers

STRONG TRACK RECORD OF DELIVERING SHAREHOLDER VALUE AND REDUCING RISK
SAFETY
- Duke Energy was an industry leader for the sixth year in a row - Total incident case rate (TICR) of 0.33 in 2020
- TICR nearly 50% lower (better) than 2013 levels, the first full year after the Progress merger

NUCLEAR PERFORMANCE
- 22\textsuperscript{nd} consecutive year with a fleet capacity factor greater than 90% (94.42% in 2020)
- All six nuclear sites are recognized by the industry for exemplary performance

STORM RESPONSE
- Duke Energy has received over 20 Emergency Response Awards since EEI began recognizing storm response in 1998 (includes 7 for assisting other utilities)
- Received 7 awards for storm response in our service territories over the past decade

CUSTOMER SATISFACTION
- Beginning in 2017, developed and implemented an ecosystem of customer satisfaction measurement tools to understand and identify pain points in the current customer experience
- By focusing on improving our customers’ actual experiences, we have seen improvements in customer satisfaction that have outpaced the industry (as measured by J.D. Power & Associates’ Customer Satisfaction Index)
  - Residential J.D. Power CSI scores improved for all jurisdictions with DEP and DEF recognized as ‘Top Movers’ in 2020
  - DEC was recognized as a ‘Top Mover’ in the 2020 business study and finished in the top quartile nationally along with DEF
Rates below national average across all jurisdictions and customer classes

- Wholesale 16%

---

Duke’s scale enables top tier O&M performance

Duke Energy compares favorably against peer group across multiple O&M metrics

- #2 on non-generation O&M cost per customer vs. peer utilities
  - Peer group: AEP, SO, EXC, NEE, D, XEL, ED, ES, WEC
- Scale better positions Duke to drive O&M efficiencies
- O&M efficiency keeps customer rates low and creates headroom for growth

Source: SNL FERC Form 1, annual filings and investor presentations; data as of YE 2020; (1) Reflects total electric O&M net of power production O&M;
Strong O&M cost management track record

**Event-driven cost savings**

- **2006: Cinergy merger**
  - $300M in synergies in non-fuel O&M
  - ~9% of total non-fuel O&M

- **2012: Progress merger**
  - $550M in synergies in non-fuel O&M
  - ~9% of total non-fuel O&M, exceeded merger target of 5-7%
  - $687M in fuel and joint-dispatch savings over five years

- **2016: Piedmont acquisition**
  - Absorbed $300M in O&M

- **2020: COVID mitigation**
  - 2020 O&M savings of ~$320M; $200M of sustainable savings

**Sustainable cost efficiencies**

- Integrated functions with strong jurisdictional leadership
- Best practice sharing and scale purchasing
- Employing data analytics and digital capabilities to enhance decision making and prioritization
- State of the art Innovation Center – Optimist Hall

#### SEGMENT RESULTS VS. PRIOR YEAR QUARTER

**Electric Utilities & Infrastructure, +$115 M (+$0.15 per share)**
- ▲ Contribution from base rate changes (+$0.10 per share)
- ▲ Weather (+$0.09 per share)
- ▲ Timing of O&M expenses (+$0.03 per share)
- ▼ Retail and wholesale electric volumes (-$0.03 per share)
- ▼ Regulatory lag on growing asset base (-$0.04 per share)

**Gas Utilities & Infrastructure, +$1 M (flat)**
- ▲ Riders and LDC margin expansion (+$0.03 per share)
- ▲ Contribution from base rate changes (+$0.01 per share)
- ▼ Regulatory lag on growing asset base (-$0.01 per share)
- ▼ ACP cancellation (-$0.03 per share)

**Commercial Renewables, -$30 M (-$0.04 per share)**
- ▼ Impacts from Texas Storm Uri (-$0.04 per share)

**Other, +$48 M (+$0.06 per share)**
- ▲ Higher market returns on benefit trusts (+$0.04 per share)
- ▲ Holdco financing costs (+$0.02 per share)

### Total Share Dilution (-$0.05 per share)

(1) Based on adjusted EPS
(2) Excludes share dilution impacts for each segment of Electric Utilities & Infrastructure ($0.04), Gas Utilities & Infrastructure ($0.02), and Other $0.01. Total share dilution is ($0.05) per share.
(3) Regulatory lag includes depreciation and amortization, interest expense and property taxes

Q1 2021 RESIDENTIAL LOAD GROWTH COMPONENTS

- **Residential**: Work from home and remote learning continue to drive strong volume results.
- **Strongest residential growth trend in the last decade, particularly in the Southeast.**

Q1 2021 RETAIL ELECTRIC VOLUMES

- **Residential**: Work from home and remote learning continue to drive strong volume results.
- **Strongest residential growth trend in the last decade, particularly in the Southeast.**

**COMMERCIAL**

- **Winter surge of COVID-19 impacted close-contact activities, such as restaurants and schools.**
- **Accelerating vaccine rollout and high levels of household savings expected to support recovery as restrictions ease.**
- **Retailers expect more store openings than closings in 2021 for the first time in many years.**

**INDUSTRIAL**

- **Industrial volumes continue to steadily improve.**
- **ISM Manufacturing index showing optimism in the sector. The March 2021 reading of 64.7 is the highest level since 1983.**

\(^{(1)}\) Compared to Q1 2020 actuals. Q1 2020 results only saw modest impact from pandemic.

CONTINUE TO EXPECT 2021 RETAIL SALES GROWTH OF 1% - 2%

GROWING CUSTOMER BASE SUPPORTS NEED FOR INCREASED CAPITAL INVESTMENTS
Capital plan focused on clean energy transition

Growing 5-year capex profile...

- 2020 – 2024 (early 2020): $56B
- 2020 – 2024 (ESG Day): $58B
- 2021 – 2025 (current): $59B
- 2025 – 2029: $65B - $75B

...supports emission reductions as we drive toward net-zero

- Through 2020 reduced CO₂ emissions > 40%

$59 BILLION CAPITAL PLAN FOCUSED ON CLEAN ENERGY TRANSITION

- Drives rate base CAGR of ~6.5% over 5-year plan
- Accelerated coal plant retirements
- Grid investments to enable renewables and energy storage, resiliency and dynamic power flows
- Clean energy – mix of solar, storage and nuclear

¹PVRRs exclude the cost of CO₂ as tax. Including CO₂ costs as tax would increase PVRRs by ~$11-$16B through 2050.
²Represents an estimated nominal transmission investment; cost is included in PVRR calculation.
³All capacities are Total/Incremental nameplate capacity within the IRP planning horizon.
⁴Total solar nameplate capacity includes 3,925 MW connected in DEC and DEP combined as of year-end 2020 (projected).
⁵Includes 4-hr, 6-hr, and 8-hr grid-tied storage, storage at solar plus storage sites, and pumped storage.
⁶Contribution of EE/DR (including Integrated Volt-Var Control (IVVC) and Distribution System Demand Response (DSDR)) in 2035 to peak winter planning hour.
The 2020 IRP includes a most economic or “least-cost” portfolio, as required by North Carolina Utilities Commission (NCUC) Rule R8-60 and subsequent orders, and the Public Service Commission of South Carolina (PSCSC) and The Energy Freedom Act (Act 62), as well as multiple portfolios reflecting a range of potential future resource portfolios.

North Carolina requirements
- 2 base cases: least cost resources (with and without price on carbon). Additional carbon and coal retirement analyses required for 2020 IRPs
- NCUC will not “approve” the IRPs; rather, after a formal docket review with intervenors, the NCUC will “accept” the IRPs as reasonable for planning purposes (or reject some aspects of the IRP or make recommendations for future IRPs)
- New generation resources will need to go through specific CPCN approval processes prior to construction and must demonstrate consistency with the most recent IRP

South Carolina requirements
- First IRP filed under Act 62; which contemplates several resource portfolios developed with the purpose of fairly evaluating the range of demand-side, supply-side, storage, and other technologies and services available to meet the utility's service obligations; PSCSC will approve or deny or modify; testimony and evidentiary hearings
- Regulatory condition requires utility to utilize least cost planning
- New resources will go through new Act 62 processes and statutory requirements for cost recovery, which do note a competitive procurement process.
## Regulatory update

### NC RATE CASE ORDERS – DEC AND DEP
- Approved Partial Stipulations:
  - ROE of 9.6%; 52% equity component of cap structure
  - Deferral treatment of grid improvement plan projects of $1.2 billion including return
  - Unprotected EDIT flowback period of 5 years
- Approved Coal Ash Settlement
  - Resolves coal ash issues in 2017 and 2019 rate cases
  - Allows return at 150 basis points lower than prevailing ROE
  - Accelerates customer savings during pandemic
- Issued opinion that IRP docket more appropriate venue for generation retirements

### DUKE ENERGY FLORIDA ORDER
- FPSC approved the Settlement on May 4; Order issued June 4
- Clarity through 2024
- ROE band of 8.85% to 10.85%, with innovative trigger mechanism that insulates against rising interest rates
- Clean Energy Connection solar buildout: 750 MW to be built 2022-2024 ($1 billion investment)
- EV Charging Station program ($54 million investment)
- Accelerated depreciation for coal plants (from 2042 to 2034)
- Vision Florida program funds $100 million in emerging technologies

### LDC RATE CASES FILINGS PIEDMONT-NC/DEK

#### PNG-NC RATE CASE FILING
- Filed on March 22, 2021
- Revenue increase request of $109 million
  - ROE request of 10.25% and 52% equity component
  - Proposed rate base of $4.8 billion
- Includes investments for:
  - $250 million Robeson LNG facility
  - System growth, pipeline integrity management, infrastructure and safety and security upgrades
- Rates requested to be in effect if approved by the end of 2021

#### DEK RATE CASE FILING
- Rate case filed June 1, 2021
- Expect rates to be in effect January 2022
Advancing EV Infrastructure

- Investing $100 million to support decarbonization of the transportation sector across the Southeast. Approved programs include:
  - FL: building 700 charging stations by 2026 (590 in service)
  - NC pilot: building 310 charging stations by 2023
  - SC pilot: building 60 charging stations by 2023
  - Programs also include customer rebates that will support more than 5,000 charging stations for retail customers

- Electric Highway Coalition announced Mar. 2nd
  - Partnership between DUK, D, AEP, ETR, ES, SO, TVA to provide a seamless network of charging stations connecting major highways across a broad portion of the country

- ETransEnergy – new Duke Energy subsidiary helps companies and cities transition commercial fleets to EV’s
  - Announced pilot program with Charlotte Area Transit System (CATS) to assess performance of battery electric buses in preparation for full fleet transition

- New EV Savings Calculator online tool calculates savings from electric vehicle vs. gasoline-powered vehicle

- DUK fleet electrification commitment
  - Convert 100% of light-duty vehicles to electric, and 50% of medium-duty, heavy-duty and off-road vehicles to EVs, plug-in hybrids or other zero-carbon alternatives
  - By 2030, reduce CO₂ emissions by 60,000 metric tons and petroleum usage by 10 million gallons annually

Adjusted Earnings per Share (EPS)

The non-GAAP financial measure, adjusted EPS, represents basic EPS available to Duke Energy Corporation common stockholders (GAAP reported EPS), adjusted for the per share impact of special items. As discussed below, special items represent certain charges and credits, which management believes are not indicative of Duke Energy’s ongoing performance.

Management believes the presentation of adjusted EPS provides useful information to investors, as it provides them with an additional relevant comparison of Duke Energy’s performance across periods. Management uses this non-GAAP financial measure for planning and forecasting and for reporting financial results to the Duke Energy Board of Directors, employees, stockholders, analysts and investors. Adjusted EPS is also used as a basis for employee incentive bonuses. The most directly comparable GAAP measure for adjusted EPS is reported basic EPS available to Duke Energy Corporation common stockholders. A reconciliation of adjusted EPS for the quarter-to-date periods ended March 31, 2021 and 2020 and the year-to-date period ended December 31, 2020, to the most directly comparable GAAP measure is included herein.

Special items included in the periods presented include the following items, which management believes do not reflect ongoing costs:

- Gas Pipeline Investments represents costs related to the cancellation of the ACP pipeline and additional exit costs related to Constitution.
- Severance represents the reversal of 2018 costs, which were deferred as a result of a partial settlement in the Duke Energy Carolinas and the Duke Energy Progress 2019 North Carolina rate cases.

Adjusted EPS Guidance

The materials for Duke Energy’s Investor Update in June 2021 include a reference to forecasted 2021 adjusted EPS guidance range of $5.00 to $5.30 per share and the midpoint of forecasted 2021 adjusted EPS guidance range of $5.15. The materials also reference the long-term range of annual growth of 5% - 7% through 2025 off the midpoint of 2021 adjusted EPS guidance range of $5.15. In addition, the materials reference the expected five-year EPS growth in the Gas Utilities and Infrastructure segment of 8-10% (on a compound annual growth rate (CAGR) basis) and the five-year expected EPS growth in the Electric Utilities and Infrastructure segment of 5-7% (on a CAGR basis). The forecasted adjusted EPS is a non-GAAP financial measure as it represents basic EPS available to Duke Energy Corporation common stockholders (GAAP reported EPS), adjusted for the per share impact of special items (as discussed above under Adjusted EPS).
Due to the forward-looking nature of this non-GAAP financial measure for future periods, information to reconcile it to the most directly comparable GAAP financial measure is not available at this time, as management is unable to project all special items for future periods, such as legal settlements, the impact of regulatory orders or asset impairments.

**Adjusted Segment Income (Loss) and Adjusted Other Net Loss**

The materials for Duke Energy’s Investor Update in June 2021 include a discussion of the change in adjusted segment income (loss) and adjusted other net loss for the quarter ended March 31, 2021 compared to the quarter ended March 31, 2020, and a discussion of 2021 forecasted adjusted segment income and forecasted adjusted other net loss.

Adjusted segment income (loss) and adjusted other net loss are non-GAAP financial measures, as they represent reported segment income (loss) and other net loss adjusted for special items (as discussed above under Adjusted EPS). Management believes the presentation of adjusted segment income (loss) and adjusted other net expense provides useful information to investors, as it provides an additional relevant comparison of a segment’s or Other’s performance across periods. When a per share impact is provided for a segment income (loss) driver, the after-tax driver is derived using the pretax amount of the item less income taxes based on the segment statutory tax rate of 24% for Electric Utilities and Infrastructure, 23% for Gas Utilities and Infrastructure and Other, or an effective tax rate for Commercial Renewables. The after-tax earnings drivers are divided by the Duke Energy weighted average shares outstanding for the period. The most directly comparable GAAP measures for adjusted segment income (loss) and adjusted other net loss are reported segment income (loss) and other net loss, which represents segment income (loss) and other net loss from continuing operations, including any special items. Reconciliations of adjusted segment income (loss) and adjusted other net loss for the quarters ended March 31, 2021 and March 31, 2020, to the most directly comparable GAAP measures is included herein. Due to the forward-looking nature of any forecasted adjusted segment income (loss) and forecasted other net loss and any related growth rates for future periods, information to reconcile these non-GAAP financial measures to the most directly comparable GAAP financial measures are not available at this time, as the company is unable to forecast all special items, as discussed above under Adjusted EPS guidance.

**Funds From Operations (“FFO”) Ratio**

The materials for Duke Energy’s Investor Update in June 2021 include a reference to the expected FFO to Total Debt ratio. This ratio is a non-GAAP financial measure. The numerator of the FFO to Total Debt ratio is calculated principally by using net cash provided by operating activities on a GAAP basis, adjusted for changes in working capital, ARO spend, depreciation and amortization of operating leases and reduced for capitalized interest (including any AFUDC interest). The denominator for the FFO to Total Debt ratio is calculated principally by using the balance of long-term debt (excluding purchase accounting adjustments and long-term debt associated with the CR3 Securitization), including current maturities, imputed operating lease liabilities, plus notes payable, commercial paper outstanding, underfunded pension liability, guarantees on joint-venture debt, and adjustments to hybrid debt and preferred stock issuances based on how credit rating agencies view the instruments. Due to the forward-looking nature of this non-GAAP financial measure for future periods, information to reconcile it to the most directly comparable GAAP financial measure is not available at this time, as management is unable to project all special items, as discussed above under Adjusted EPS Guidance.

**Net Regulated Electric and Gas O&M**

The materials for Duke Energy’s Investor Update in June 2021 include a discussion of Duke Energy’s net regulated Electric and Gas operating, maintenance and other expenses (O&M) for the year-to-date periods.

Net regulated Electric and Gas O&M is a non-GAAP financial measure, as it represents reported O&M expenses adjusted for special items and expenses recovered through riders and excludes O&M expenses for Duke Energy’s non-margin based Commercial businesses and non-regulated electric products and services supporting regulated operations.

Management believes the presentation of net regulated Electric and Gas O&M provides useful information to investors, as it provides a meaningful comparison of financial performance across periods. The most directly comparable GAAP financial measure for net regulated Electric and Gas O&M is reported operating, maintenance and other expenses. A reconciliation of net regulated Electric and Gas O&M for the year-to-date periods ended December 31, 2020, 2019, 2018, 2017 and 2016, as well as the forecasted year-to-date period ended December 31, 2021, to the most directly comparable GAAP measure are included here-in.

**Business Mix Percentage**

The materials for Duke Energy’s Investor Update in June 2021 reference each segment’s 2021 projected adjusted segment income as a percentage of the total projected 2021 adjusted net income (i.e. business mix), excluding the impact of Other. Duke Energy’s segments are comprised of Electric Utilities and Infrastructure, Gas Utilities and Infrastructure and Commercial Renewables.

Adjusted segment income is a non-GAAP financial measure, as it represents reported segment income adjusted for special items as discussed above. Due to the forward-looking nature of any forecasted adjusted segment income, information to reconcile this non-GAAP financial measure to the most directly comparable GAAP financial measure is not available at this time, as management is unable to project all special items (as discussed above under Adjusted EPS Guidance).
